

Introducing DYNEX V

The latest in the Dynex TENS family

A name you know - performance you can rely on.

The Dynex history of versatility and quality have continued in the newest addition to the family – Dynex V. Offering variable rate, variable pulse duration and three stimulation mode alternatives, Dynex V is an excellent value priced alternative.

DYNEX V offers you these important features:

- ❖ Adjustable rate – 2 to 125 pulses per second.
- ❖ Adjustable pulse duration – 30 to 250 microseconds.
- ❖ Adjustable amplitude – 0 to 60 milliamperes
- ❖ Three stimulation modes: Burst, Normal and Modulation.
